Our Cover

This issue recaps the 2026 HamSCI Workshop, which ARRL hosted on March 14 – 15. The cover depicts one of the most remote installations of HamSCI's Personal Space Weather Station (PSWS) HF Receiver, a wideband 0.1 – 64 MHz SDR receiver that's particularly useful to hams who want to take part in citizen science, and who also want a device that can report operating conditions at their own station. There are already 30 of these receivers deployed around the world, with one of the sites being the Neumayer Station III, DPØGVN, in Antarctica, seen at the center of the photo. Read the HamSCI Workshop coverage in this issue to learn more about the PSWS and other HamSCI projects and initiatives. [Pablo Conrat Fuentes, photo]
